Untruly Yours-Smita Shetty 2012-05 To some Natasha Iyer has it all - Living the life of an affluent NRI, wife of a prominent Psychologist and mother to a cheeky 11 year old. However, behind closed doors, cracks are beginning to appear in her seemingly comfortable relationship with her professionally consumed husband, Rakesh. Although Rakesh seems content with his alpha neatness-fetish-melodramatic wife and bright son; Natasha yearns for romance, passion and excitement. Ironically, the Psychologist husband fails to read between the lines and Natasha is left to her own devices to deal with her unresolved emotions. An unexpected call from India takes her through a journey of self-discovery with her devastatingly handsome work colleague, Steve. She uncovers in some aspects urban India has changed considerably but equally, deep-rooted social issues still prevail in the so called modern, educated, changing society. A chance encounter with her 'blast from the past' - Veer, adds to the emotional rollercoaster

ride. Her one-man-woman status of many years has failed to equip her with vital tools to deal with the unanticipated surge of attention from Steve and Veer. As she attempts to master the finer points of courtship, flirtation and seduction; her life spirals out of control. Natasha is compelled to make tough decisions about her love, friendship, marriage and parenthood.

Modeling and Simulation of Systems Using MATLAB and Simulink-

Devendra K. Chaturvedi 2017-12-19 Not only do modeling and simulation help provide a better understanding of how real-world systems function, they also enable us to predict system behavior before a system is actually built and analyze systems accurately under varying operating conditions. Modeling and Simulation of Systems Using MATLAB® and Simulink® provides comprehensive, state-of-the-art coverage of all the important aspects of modeling and simulating both physical and conceptual systems. Various real-life examples show how simulation plays a key role in understanding real-world systems. The author also explains how to effectively use MATLAB and Simulink software to successfully apply the modeling and simulation techniques presented. After introducing the underlying philosophy of systems, the book offers step-by-step procedures for modeling different types of systems using modeling techniques, such as the graph-theoretic approach, interpretive structural modeling, and system dynamics modeling. It then explores how simulation evolved from pre-computer days into the current science of today. The text also presents modern soft computing techniques, including artificial neural networks, fuzzy systems, and genetic algorithms, for modeling and simulating complex and nonlinear systems. The final chapter addresses discrete systems modeling. Preparing both undergraduate and graduate students for advanced modeling and simulation courses, this text helps them carry out effective simulation studies. In addition, graduate students should be able to comprehend and conduct simulation research after completing this book.

Exchange-Traded Funds-A. Seddik Meziani 2016-07-15 With Exchange Traded Fund (ETF) sponsors constantly making new types of ETFs available, there is now a variety of ETFs that provide investors with an opportunity to develop diversified investment portfolios. Their sophistication has also grown to include a breed of ETFs that do not passively track the performance of an underlying index. With this assortment of newer ETFs, and more on the way, market strategists are now capable of devising all-ETF portfolios based on a multitude of asset allocation schemes that respond to the need of their clients. This book provides a comprehensive overview of the changes brought about by ETFs. It describes and analyses recent changes alongside their impact on investment portfolios, and discusses the continuing success of index-based ETFs and the reasons underlying their long-lasting achievements. The book offers an objective discourse on the newly minted smart beta ETFs and some of the issues

surrounding them, and provides an overview of how the increasingly widespread ETF-based portfolio hedging strategies are constructed and implemented. Paying particular attention to the importance of asset allocation and the essential role it plays in portfolio construction, this book explores the role played by ETFs in changing investors' attitudes toward home bias, covering both established and emerging frontier markets. The author leverages his extensive background to integrate best professional practices and academic rigor for an increased understanding of the ever-evolving world of ETFs.

Secure ICT Service Provisioning for Cloud, Mobile and Beyond-

Eberhard Faber 2012-12-13 This book introduces a reference architecture that enhances the security of services offered in the information and communication technology (ICT) market. It enables customers to compare offerings and to assess risks when using third-party ICT services including cloud computing and mobile services. Service providers are given a comprehensive blueprint for security implementation and maintenance covering service portfolio management, bid phases and realization projects as well as service delivery management. The architecture is completely modular and hierarchical. It contains a security taxonomy organizing all aspects of modern industrialized ICT production. The book also describes a wealth of security measures derived from real-world challenges in ICT production and service management.

The Mastery of Music-Barry Green 2008-11-19 The Inner Game of Music, the breakout hit that became a standard primer in the music world, has taught thousands of musicians—professionals and amateurs alike—how to overcome self-consciousness and stage fright and to recapture a youthful, almost effortless capacity to learn. Now, in his follow-up book, The Mastery of Music, Barry Green turns his expert hand to the artistic qualities that make an extraordinary musician. Culling advice from dozens of interviews with legends including Joshua Bell, Dave Brubeck, Jeffrey Kahane, Bobby McFerrin, Christopher Parkening, Doc Severinsen, Frederica von Stade, the Harlem Boys Choir, and the Turtle Island String Quartet, he reveals that it's not enough to have a cerebral and emotional connection to the notes. Green shows how musical excellence, exhibited by true virtuosos, requires a mastery of ten unique qualities of the soul and the human spirit, such as confidence, passion, discipline, creativity, and relaxed concentration, and he discusses specific ways in which all musicians, composers, and conductors can take their skills to higher levels. He carefully incorporates all instruments and techniques in his rejuvenating discussions, inspiring the stifled student to have fun again and the over-rehearsed performer to rediscover the joy of passionate expression. Essential reading for every

musician, The Mastery of Music strikes a beautiful new chord.

Secure ICT Service Provisioning for Cloud, Mobile and Beyond-

Eberhard von Faber 2017-03-13 This book describes new methods and measures which enable ICT service providers and large IT departments to provide secure ICT services in an industrialized IT production environment characterized by rigorous specialization, standardization and division of labor along the complete supply chain. This book is also for suppliers playing their role in this industry. Even more important, user organizations are given deep insight in secure IT production which allows them to make the best out of cloud, mobile and beyond. This book presents a new organization and classification scheme being thoroughly modular and hierarchical. It contains a security taxonomy that organizes all aspects of modern industrialized IT production. The approach takes operational requirements into account and focuses on user requirements, thus facing the reality in the market economy. Despite cost pressure, providers must ensure security by exploiting economies of scale to raise the efficiency also with respect to security. Furthermore, this book describes a wealth of security measures derived from real-world challenges in IT production and IT service management.

To Conquer a Highlander-Mary Wine 2010-07-01 "Not to be missed." - Lora Leigh, New York Times #1 bestselling author of Black Jack A fierce Highland laird ready to kill for king and country... When Torin McLeren discovers his neighbor's plot against his king, he takes their daughter as his prisoner, thereby stopping her father's plot from going forward. But that leaves him with a woman under his roof whom he can't ignore, and not just because she's his enemy's daughter... A woman who's as much trouble as she is temptation... Shannon McBoyd decides to use her captor to experience passion for the first time, and then to destroy him. But her plan goes awry because once she has lured Torin into her bed, she no longer wants to hurt the one man who seems to value and understand her... Even if her father will kill him-and her-when he discovers what they've done... "Deeply romantic, scintillating, and absolutely delicious." -Sylvia Day, national bestselling author of The Stranger I Married "Mary Wine's writing is absolutely stellar." -CK2 Kwips & Critiques "Mary Wine has a definite

knack for pacing, and the story never lets up." -Bookaholics

Combat Modeling-Alan Washburn 2009-08-14 "Combat Modeling" is a systematic learning resource and reference text for the quantitative analysis of combat. After a brief overview, authors Washburn and Kress present individual chapters on shooting without feedback; shooting with feedback; target defense; attrition models; game theory and wargames; search; unmanned aerial vehicles; and terror and insurgency. Three appendices provide a review of basic probability concepts, probability distributions, and Markov models; an introduction to optimization models; and a discussion of Monte-Carlo simulations. Drawing on their many years of experience at the Naval Postgraduate School in Monterey, California, Washburn and Kress have created a reference that will provide the tools and techniques for analysts involved in the underpinnings of combat decisions. This is a book that can be used as a military manual, reference book, and textbook for military courses on this vital subject.

Water Stress in Plants-Ismail M. M. Rahman 2016-08-24 Water stress in plants is caused by the water deficit, as induced possibly by drought or high soil salinity. The prime consequence of water stress in plants is the disruption in the agricultural production, resulting in food shortage. The plants, however, try to adapt to the stress conditions using biochemical and physiological interventions. The edited compilation is an attempt to provide new insights into the mechanism and adaptation aspects of water stress in plants through a thoughtful mixture of viewpoints. We hope that the content of the book will be useful for the researchers working with the plant diversity-related environmental aspects and also provide suggestions for the strategists.

Essentials of Human Anatomy & Physiology-Elaine N Marieb 2015-10-08 Now in its Ninth Edition, Essentials of Human Anatomy & Physiology continues to set the standard for short-course A&P texts with an enhanced media package, an updated art program, and new "active learning" features that help allied health students better visualize and understand the structure and function of the human body. Elaine Marieb's clear and friendly writing style emphasizes the relevance of anatomy and physiology to students' lives and careers. It clarifies concepts, defines key terms, and offers just the right balance of anatomy, physiology, and clinical coverage to make the content complete without being overwhelming. While many authors merely condense a two-semester text to meet a one-semester

need, Elaine Marieb wrote this book specifically for the one-semester course and continues to carefully select a range of material that proves just right for the shorter course. New information on hot topics like DNA fingerprinting, contraception, stem cell research, and obesity draws students into the material, while a flexible topic structure allows instructors to choose a chapter sequence to meet virtually any need. CourseSmart

textbooks do not include any media or print supplements that come packaged with the bound book.
