<p><b>Electrogravitics II-</b>Thomas Valone 2005 A companion volume to 'Electrogravitics Systems: Reports on a New Propulsion Methodology', this book delivers: (1) the scientific validation from three different authorities; (2) the compelling public history of gravity research conducted by the aviation industry before it became 'unacknowledged' and (3) testimonials which eye-witnesses have provided. In total, this anthology attests to the validity of the Biefeld-Brown high voltage force effect. The book's Science Section includes a well-known 'electrokinetic force' and how it works; the proposed ion mobility explanation; and how electricity and gravity may couple. The Historical Section contains seven articles about T T Brown, gravity research, etc. Also included are a Testimonial Section and Patent Section.</p>

<p><b>Managing Construction Projects-</b>Graham M. Winch 2012-11-20 Project management is of critical importance in construction, yetits execution poses major challenges. In order to keep a project ontrack, decisions often have to be made before all the necessaryinformation is available. Drawing on a wide range of research, Managing ConstructionProjects proposes new ways of thinking about project managementin construction, exploring the skills required to manageuncertainty and offering techniques for thinking about thechallenges involved. The second edition takes the informationprocessing perspective introduced in the first edition and developsit further. In particular, this approach deepens the reader'sunderstanding of the dynamics in the construction project process- from the value proposition inherent in the project mission,to the functioning asset that generates value for its owners andusers. Managing Construction Projects is a unique andindispensible contribution to the available literature onconstruction project management. It will be of particular benefitto advanced students of construction and construction projectmanagement, as well as contractors and quantity surveyors. Reviews of the First edition: "A massive review of the art and science of the management ofprojects that has the great virtue of being a good read wherever itis touched. It spills the dirt on things that went wrong,elucidates the history so you can understand the industry's currentstance, draws on other countries experience and explains the latestmanagement processes. Throughout it is liberally sprinkled withanecdotes and case histories which amply illustrate the dos anddon't for practitioners wishing to deliver projects on time toexpected quality and price. A valuable book for students andpractitioners alike." —John D Findlay, Director, Stent "This is a valuable source for practitioners and students. Itcovers the A-Z of project management in a confident contemporarymanner, and provides a powerful and much needed conceptualperspective in place of a purely prescriptive approach. Theengaging presentation introduces a range of challenges toestablished thinking about project management, often by makingcomparisons between practices in the UK and those of othercountries." —Peter Lansley, Professor of Construction Management,University of Reading "A refreshing and unique study of information management and itsimpact upon international construction project management.... Thebook is well presented and written, logical and succinct and isflexible enough to allow readers to either read from start tofinish or to dip into selected chapters. This book deserves to bean established text for any construction or civil engineering under- and/or postgraduate course." —CNBR, 25th November 2003 "Generous use is made of anecdotes andc case historiesthroughout to support the theory. the book illustrates the mistakesmade by others, and the means to deliver projects on time and tocost." —Building Services Journal, April 2004</p>

<p><b>Protection Against Overcurrent-</b>ANONIMO 2002-01 A guide to the wiring regulations for protection against overcurrent. It is part of a series of guidance notes, each of which enlarges upon the particular requirements of a part of the 16th edition wiring regulations. The text is cross-referenced to the regulations and aligns with BS 7671:2001.</p>
<p><b>Generating Electricity in a Carbon-Constrained World-</b>Fereidoon P. Siohshansi 2009-10-21 The electric power sector is what keeps modern economies going, and historically, fossil fuels provided the bulk of the energy need to generate electricity, with coal a dominant player in many parts of the world. Now with growing concerns about global climate change, this historical dependence on fossil-fuels, especially those rich in carbon, are being questioned. Examining the implications of the industry's future in a carbon-constrained world, a distinct reality, is the subject of this book. Containing contributions from renowned scholars and academics from around the world, this book explores the various energy production options available to power companies in a carbon-constrained world. The three part treatment starts with a clear and rigorous exposition of the short term options including Clean Coal and Carbon Capture and Sequestration Technology, Coal, and Emission trading. Renewable energy options such as Nuclear Energy, Wind power, Solar power, Hydro-electric, and Geothermal energy are clearly explained along with their trade-offs and uncertainties inherent in evaluating and choosing different energy options and provides a framework for assessing policy solutions. This is followed by self-contained chapters of case-studies from all over the world. Other topics discussed in the book are Creating markets for tradable permits in the emerging carbon era, Global Action on Climate Change, The Impossibility of Staunching World CO2 Emissions and Energy efficiency. Clearly explains short term and long term options Contributions from renowned scholars and academics from around the world Case-studies from all over the world</p>
<p><b>Durability of Building Materials and Components B: Service life and durability of materials and components-</b>Michael A. Lacasse 1999 This volume provides a selected overview of approaches, methods, techniques, tools, systems and technology used to develop knowledge of the service life durability of construction and building materials.</p>
<p><b>The Compact City-</b>Elizabeth Burton 2003-09-02 This book presents the latest thinking on the benefits and dangers of higher density urban living. It offers diverse opinions and research, from a wide range of disciplines, and gives an insight into both the theoretical debate and the practical challenges surrounding the compact city. Essential reading for anyone with an interest in sustainable urban development.</p>
<p><b>Economics-</b>Geoffrey Whitehead 2014-05-15 Economics: Made Simple, 14th Edition covers all the basic aspects of the economic organization of free-enterprise societies, with special reference to Great Britain's position in the European Community. The book tackles the production, distribution, and exchange of goods and services, both within a country and internationally. The text also discusses the basic ideas on production; the factors, scale, and location of production; and the types of business units. The theory of price determination, the money system, the importance of the distribution theory, and the theory of international trade are also discussed. The book describes macroeconomics and the problems associated with it; national income; the development of economic theory; and money, monetary policy, and monetarism. The part played by governments in controlling abuses, promoting social progress, and managing prosperity and the historical development of Economics are considered as well. Students reading books on Economics as a liberal study and practicing eonomists will find the book useful.</p>
<p><b>Advanced Research Methods in the Built Environment-</b>Andrew Knight 2009-03-16 This book provides a bridge between the introductory research methods books and the discipline-specific, higher level texts. Its unique feature is the coverage of the detailed process of research rather than the findings of research projects. Chapter authors have been carefully selected by their expertise, discipline and location to give an eclectic range of perspectives. Particular care has been taken to balance positivist with interpretivist approaches throughout. The authors focus is on the practical consequences of research philosophies, strategies and techniques by using their own research and by evaluating the work of others. Advanced Research Methods in the Built Environment addresses common topics raised by postgraduate level researchers rather than dealing with all aspects of the research process. Issues covered range from the practicalities of producing a journal article to the role of theory in research. The material brought together here provides a valuable resource for the training and development of doctoral and young researchers and will contribute to a new sense of shared methodological understanding across built environment research.</p>

<p><b>BIM Handbook-</b>Rafael Sacks 2018-07-03 Discover BIM: A better way to build better buildings Building Information Modeling (BIM) offers a novel approach to design, construction, and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Third Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working, national and major construction clients, BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of the art in building information modeling, the BIM Handbook, Third Edition guides readers to successful implementations, helping them to avoid needless frustration and costs and take full advantage of this paradigm-shifting approach to construct better buildings that consume fewer materials and require less time, labor, and capital resources.</p>
<p><b>Earth—In the Beginning-</b>Eric N. Skousen, Ph.D. 101-01-01 With a background in the physical sciences, Dr. Eric Skousen has produced a stunning account of the creation of the earth from the findings of earth scientists and the teachings of the Lord’s prophets. At last, many unanswered questions about the earth’s creation can be resolved with confidence. For example, how long did it take? Where did it take place? What about evolution, fossils, dinosaurs and cave men? Well-supported answers are here. For those who have been challenged to explain the earth’s creation from an LDS viewpoint, this book will be helpful and enlightening. And for those who enjoy contemplating both the discoveries of science and the revelations of God, this book will be extremely stimulating and thought-provoking. Readers have commented: Dan from Canada: “This book has enlightened my mind and given me the wonderful opportunity to see the intermeshing between science and our religion.” Paul from Texas: “Well-supported viewpoint and thought-provoking reading.... I appreciate Brother Skousen’s heavy usage of scriptural references and quotes from trustworthy Church leaders.” Kristy from Utah: “Answered a lot of questions I had from my geology classes and gave me a deeper appreciation for this awesome planet we live on and the creator of it.” Kelly from California: “This book explained so much about issues that had previously confused or bothered me.” Jerome from Georgia: “Life altering, made me a better person.... If you really want to understand the ‘Big Picture’ then this book is a must read.” Dave from Washington: “One unexpected blessing received from reading this book was an enhanced Temple worship experience.” Ed from Iowa: “If you are LDS, this will open your eyes to things that are incredible and you will not look at the world we live in in the same way again.” Devon: “Scholarly material well presented for the layman.” This eBook includes the original index, illustrations, footnotes, table of contents and page numbering from the printed format.</p>
<p><b>Cost Modelling-</b>Ronald Martin Skitmore 1999 Cost models underlie all the techniques used in construction cost and price forecasting, yet until relatively recently industry has been unfamiliar with their characteristics and properties. An understanding of the various types of cost model is vital to enable effective cost control and the development of future forecasting techniques. This volume brings together more than 20 seminal contributions to building cost modelling and introduces the major landmarks in progress and thinking in this field: * strategies and directions * explorations in cost modelling * cost-product/process modelling * dealing with uncertainty The strong techniques bias of this book will appeal to construction professionals involved in estimating, as well as researchers and students of building economics.</p>
<p><b>Heart Disease in Pregnancy-</b>Celia Oakley 2008-04-15 The new edition of this practical guide draws on the clinical skills of a wide range of international experts to help you recognize and manage heart disease in pregnancy. Designed for on-the-spot use, this convenient and concise text helps you identify a cardiac problem, understand its pathophysiology, and respond appropriately. Under the careful editorial direction of Drs. Oakley and Warnes, the Second Edition introduces new contributors from North America and Europe as well as new chapters on: pulmonary hypertension rheumatic heart disease artificial heart valves Marfan syndrome auto-immune diseases hypertrophic cardiomyopathy rhythm disorders hypertension cardiac intervention The entire book is scrupulously updated to reflect the most current standards of care. The contributors – all recognized leaders in their respective fields – outline the pathway to diagnosis and appropriate management by a multi-disciplinary team. Although heart disease is the leading medical cause of maternal death, clinical trials in this population are few and the evidence base is small. The expert recommendations in Heart Disease in Pregnancy, Second Edition, are a welcome source of information for cardiologists, obstetricians, general practitioners, and all members of the patient care team.</p>
<p><b>Building Air Quality-</b>Elizabeth Agle 1991 Provides the latest information about indoor air quality problems and how to prevent and correct them. Packed with valuable information on how to: develop an indoor air quality building profile; create an indoor air quality management plan; identify causes and solutions to problems as they occur, and identify appropriate control strategies. Special sections cover: air quality sampling; heating, ventilating, and air conditioning systems; mold and moisture problems, and much more. In looseleaf binder with tabbed dividers.</p>
<p><b>Conditions of Contract for Design-build and Turnkey-</b>Fédération internationale des ingénieurs-conseils 1995 The terms of the Conditions of Contract for Design - Build and Turnkey have been prepared by the Federation Internationale des Ingenieurs Conseils (FIDIC) and are recommended for general use for the purpose of the design and construction of works where tenders are invited on an international basis; with minor modifications, the Conditions are also suitable for use on domestic contracts.</p>
<p><b>Designated Targets-</b>John Birmingham 2005-10-25 It's World War II and the A-bomb is here to stay. The only question: Who's going to drop it first? The Battle of Midway was forever transformed by the devastating appearance of a U.S.-led naval task force from the twenty-first century. Since that day, state-of-the-art warships have prowled the Pacific, armed with the latest instruments of mass destruction, as the warring powers of 1942 scramble to be first to wield the weapons of tomorrow against their enemies. Russia and Germany form a deadly alliance, while Admiral Yamamoto moves to seize Hawaii and invade Australia. Suddenly it's a whole new war with unimaginable high-tech tools, and high-stakes inter-national betrayals from Tokyo to Washington to the Kremlin. As the world trembles on the brink of anni-hilation, Churchill, Stalin, Roosevelt, Hitler, and Tojo confront extreme choices and a future rife with possi-bilities—all of them apocalyptic.</p>
<p><b>Risk Management-</b>Standards Australia International 2009 "Provides a generic guide for managing risk. It may be applied to a wide range of activities or operations of any public, private or community enterprise, or group." - publisher's website.</p>
<p><b>The Impact of Building Information Modelling-</b>Ray Crotty 2013-03-01 Construction projects involve a complex set of relationships, between parties with different professional backgrounds trying to achieve a very complex goal. Under these difficult circumstances, the quality of information on which projects are based should be of the highest possible standard. The line-based, two dimensional drawings on which conventional construction is based render this all but impossible. This is the source of some major shortcomings in the construction industry, and this book focuses on the two most fundamental of these: the failure to deliver projects predictably; to the required quality, on time and within budget; and the failure of most firms in the industry to make a survivable level of profit. By transforming the quality of information used in building, BIM aims to transform construction completely. After describing and explaining these problems, the way in which BIM promises to provide solutions is examined in detail. A discussion of the theory and practice of BIM is also provided, followed by a review of various recent surveys of BIM usage in the US, UK and selected European economies. The way in which other industries, including retail and manufacturing, have been transformed by information are explored and compared with current developments in the deployment of BIM in construction. Five case studies from the UK show how BIM is being implemented, and the effects it is having on architects and contractors. This book is perfect for any construction professional interested in improving the efficiency of their business, as well as undergraduate and postgraduate students wishing to understand the importance of BIM.</p>
<p><b>Guidelines for Perinatal Care-</b>Aap Committee on Fetus and Newborn 2017 The gold-standard guide from the AAP and ACOG -- newly updated and more valuable than ever! Significantly revised and updated, the new 8th edition of this bestselling manual provides the latest recommendations on quality care of pregnant women, their fetuses, and their newborn infants. Jointly developed by the American Academy of Pediatrics (AAP) and American College of Obstetricians and Gynecologists (ACOG), this unique resource addresses the full spectrum of perinatal medicine from both the obstetric and pediatric standpoints. New in the 8th edition: New section on suggested levels of maternal care from birth centers to Level IV institutions New sections on screening for preterm delivery risk added to chapter on antepartum care New topics covered include the timing of cord clamping, the need (or not) for bedrest, and updates in hypertension Guidance regarding postpartum contraception recommendations has been expanded New section on mosquito-borne illnesses (including Zika) New section on infections with high-risk infection control issues Updated recommendations on neonatal resuscitation, screening and management of hyperbilirubinemia, and neonatal drug withdrawal.</p>
<p><b>Guidance Note 3: Inspection &amp; Testing-</b>The IET 2015-01 Important changes to the EIC and EICR forms make Guidance Note 3: Inspection &amp; Testing a priority for all those carrying out inspection and testing on electrical installations. Amendment 3 publishes on 5 January 2015 and comes into effect on 1 July 2015. All new installations from this point must comply with Amendment 3 to BS 7671:2008. Additional changes to this book from expected updates to Amendment 3 include: * Changes to earth fault loop impedances for all protective devices * Earth electrode testing</p>
<p><b>Modern Welding Technology-</b>Howard B. Cary 1989 This well-respected, introductory welding book contains coverage of the latest codes, materials, and processes necessary to become proficient in an ever more complex industry. The technology of welding is growing and the book's focus on arc welding processes and the use of steel in construction reflect those changes-while continuing to provide a comprehensive coverage of basic principles and theory. Contains content on hybrid welding and stir friction welding; background concepts and basic welding techniques; the latest standards, codes, and specifications provided by the AWS; the most recent information on the use of high strength metals, laser welding, and arc and oxyacetylene welding; specifications for filler materials, electrodes, brazing fluxes, etc.; computer-aided welding processes; the latest information on the training of welding personnel; and welding power sources. For any welding-related occupations, especially welding inspectors, technicians, or engineers.</p>
<p><b>Guidance Note 1-let</b> 2011-09-01 Electric wiring systems, Electrical installations, Electric power systems, Electrical engineering, Electrical safety, Safety engineering, Electric shocks, Electrical accidents, Fire safety, Electrical protection equipment, Low-voltage installations, Low voltage, Extra-low voltage, Voltage, Electric current, Electric load, Electric power transmission, Electric power distribution, Industrial electrical installations, Domestic electrical installations, Temporary electrical installations, Electrical equipment, Open electrical equipment, Protected electrical equipment, Building &amp; Construction</p>
<p><b>National Physical Plan-</b>Malaysia 2005</p>
<p><b>Medical Vehicles and Their Equipment. Road Ambulances-</b>British Standards Institute Staff 2007-06 Ambulances, Emergency vehicles, Design, Performance, Mass, Loading, Vehicle components, Dimensions, Braking systems, Vehicle bodywork, Chassis, Cabs, Ergonomics, Vehicle doors, Vehicle windows, Vehicle seating, Loading areas, Medical equipment, Rated power, Electrical installations, Position, Health and safety requirements, Equipment safety, Safety measures, Ventilation, Strength of materials, Acoustic measurement, Performance testing, Vibration testing, Mechanical testing, Patient transport equipment</p>
<p><b>Transportation Engineering and Planning-</b>C. S. Papacostas 2005 Interdisciplinary introduction to transportation engineering serving as a comprehensive text as well as a frequently cited reference for a course in transportation engineering in the Civil Engineering Department.</p>
<p><b>Quality Improvement Tools &amp; Techniques-</b>Peter Mears 1995 This book presents full descriptions of all of the important QI techniques - and the specific tools necessary to make each of them work - in a logical, easy-to-use manner. There's also an ongoing case example appearing throughout the book, which illustrates and illuminates various QI principles and practices.</p>
